

InciWeb As-Is Pre-SAN Migration Architecture

Object Store supported by NFS High Availability (HA) Appliance

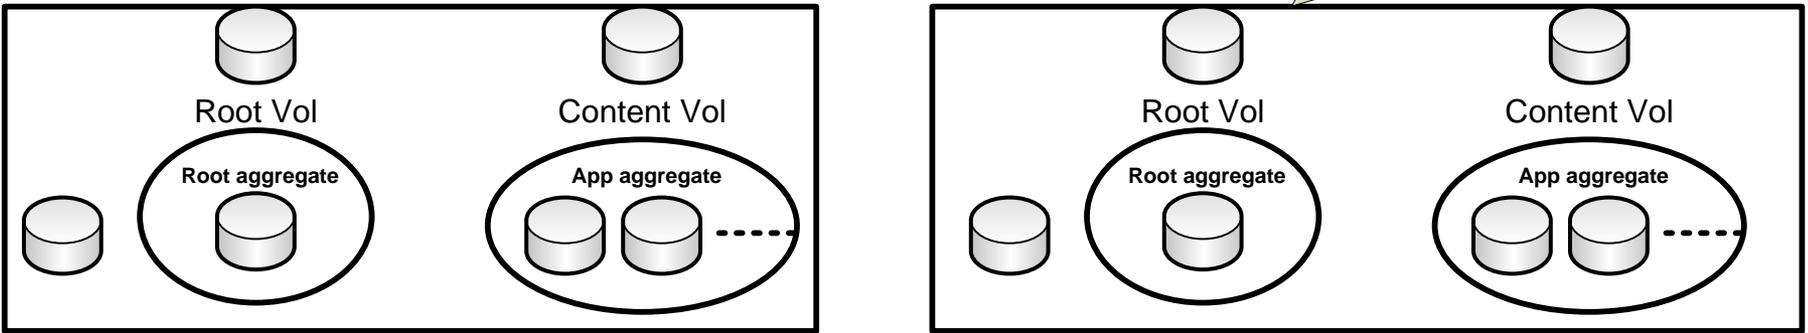

Internet

RO – Read Only
RW – Read Write

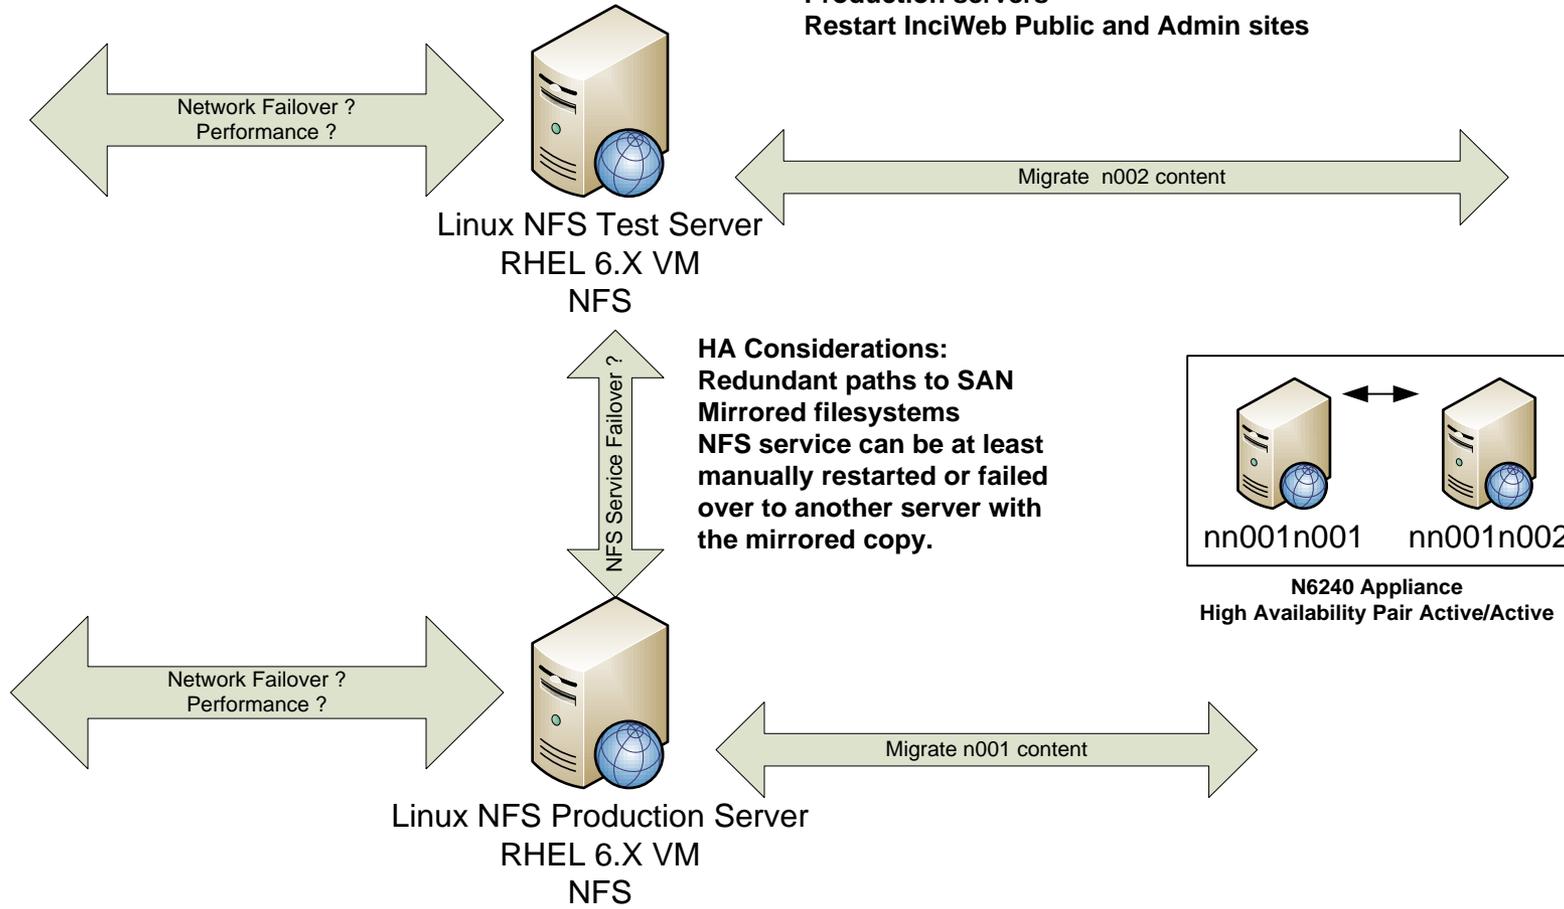

Filesystems

DS5100 Array LUNs

High Level Migration Process and HA Considerations

Shutdown InciWeb Public and Admin sites
Migrate InciWeb Test and Production content to Linux filesystems
on a Test and Production Linux VM
Export the Linux filesystems as NFS mounts
Remount InciWeb NFS filesystems on the InciWeb Test and
Production servers
Restart InciWeb Public and Admin sites

InciWeb "To-Be" Post SAN Migration Architecture

Object Store supported by independent Linux VMs with NFS services
